# Exbitron Digital Token (EXTO)

Exbitron Digital Token is the native cryptocurrency of Exbitron exchange.

It belongs to a group of cryptocurrencies often referred to as „exchange tokens“.

**Exbitron Digital Token** was issued in October 2021 and will be distributed in upcoming months to Exbitron users through pre-sale, airdrops and giveaways which will be done on our social channels. After the pre-sale or giveaway, users will be able to trade it and benefit from the opportunities that **Exbitron Token** made available on the Exbitron exchange.

# Features

## Blockchain

Built on TRON blockchain,  
Smart Contract Platform.

## Fast blockchain

Fast and low cost  
transactions.

## Secure

All the EXTO transactions  
are public, which makes  
them easily trackable in  
case of any dispute.

## Decentralization

Next-generation DeFi  
ecosystem

100,000,000

Total Supply (EXTO)

8

Decimals

October 2021

Issue Date

# Supply division

**3M max. unlocked every year = 25 years fixed for coin distribution**

# Usage

**100 000 000 EXTO – total supply (TRC20 BEP20 ERC20)**

20 000 000 EXTO = reserved for development team, marketing purposes, different exchange listings - locked and not distributed first 2 years.

3 000 000 EXTO = unlocked and distributed every year for market usage, exchange services, airdrops, giveaways, and bounty.

## Exchange token

EXTO will have its own trading section on Exbitron exchange.

## Coin Voting / Shared Listing

It will be able to use EXTO, to vote for your favorite coin from coin voting list!  
And pay listing fee with EXTO also!

## Exbitron Fees

New EXTO market with zero maker / taker fee.

# Roadmap

Q3 2021

Exbitron  
Digital Token  
was born!

Q1 2022

Make Coin  
Voting  
possible on  
Exbitron with  
EXTO.

Q2 2022

Implement  
EXTO to other  
popular  
blockchains.

Q1 2023

EXTO  
Staking  
(23.01.23)

Q4 2023

DeFi stage.

# EXTO-STAKING

**On 23.01.2023 we are launching EXTO-STAKING.**

Freeze (lock) your available EXTO tokens on Exbitron.com to stake wallet and receive rewards every month.

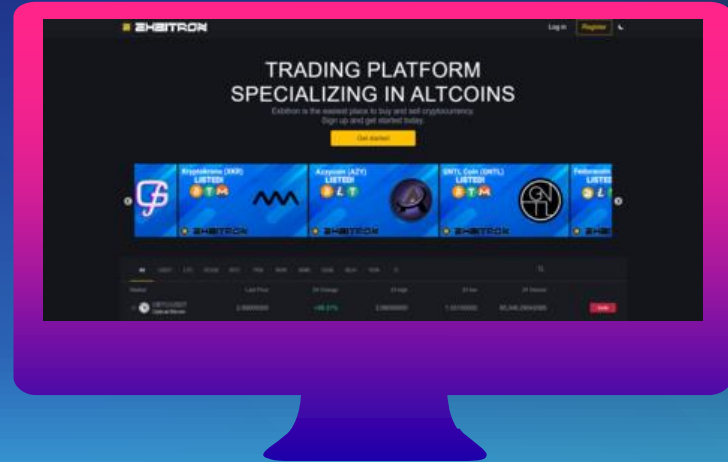

## **How does it work?**

Every exchange is built to be profitable and to make profit. We are classic centralized exchange with the same purpose but a little bit different. We, on EXBITRON, appreciate every member, every miner that has put huge trust in us and helped us build our projects. We would like to bring whole new concept of exchange operations. We would like to share up to 40% of real profit of our EXBITRON among EXTO-STAKERS. Buy EXTO, stake it and get paid in USDT or BTC. Every year's total circulation of EXTO will equal to 40% of EXBITRON profit.

Monthly profit will be always published and the formula for current month profit distribution. We will be exchange where you don't only put your money but where you get paid by making us profit. Every year there will be maximum 3 000 000 new EXTO added to circulation so the first year of EXTO-STAKING launch there will be max 6 000 000 EXTO in the circulation and those will equal to 40% of exchange profit. Every year the amount of EXTO in circulation can raise up to 3 000 000. We choose this formula to slowly unlock tokens to match the needed liquidity. Each new year, more EXTO will be needed to acquire up to 40% of exchange profit, but every year the profit of Exbitron will grow.

# Exbitron Exchange

Don't forget to check our Exbitron exchange, where you will be able to trade EXTO!
